Keep clear of all unwanted files, temporary files, temporary Internet files and temporary service files for improving system performance and user experience. Windows Explorer identifies temporary files with a special icon and a temporary file name. Once you manually clear these files, they can re-appear. If you have disabled the temporary file backup, you will experience this situation more often. Auto Cleaner will clean these temporary files automatically to improve system performance and stability. Auto Cleaner features the following system cleaning functions: - Remove files from the

temporary folder by date or time - No file is ever lost or overwritten - Move temporary files to the recycle bin - Temporary files are removed from the Temporary folder and returned to the recycle bin - Clear the temporary folder with a one click operation - Simply right click on the Auto Cleaner icon in the system tray and select "Auto Clean". - Synchronize with the system clock - Automatically clean files in the temporary folder at regular intervals of time Note: Auto Cleaner will run without installation. Please read the included ReadMe file if you would like to use the program. With over 200,000 users worldwide, it's the perfect solution for maintaining a clean system. Compatibility Windows

2000/XP/2003/Vista/7/8/10 System Requirements Runtime - Windows 2000/XP/2003/Vista/7/8/10 -.NET Framework 2.0 and up You need to install .NET framework 2.0 or higher in order to use this program. This program will detect which version of .NET framework you are using and automatically download the correct version for you to use. User rating You rated this 0 stars out of 5 Installation instructions Run the executable. It will open the program setup wizard. Click Next. Click Yes to the question about the program being the first in the batch of programs that will be installed. Click Next to install the application. Run the executable again. It will open the

application start wizard. Select the "Add Auto-Start entries to the registry" checkbox. Click Next. Click Finish to complete the installation. Press Ctrl+Shift+Esc to open the Task Manager. Click the Startup tab. Right click on the application's entry and select "Open". Select the "Rest

What's New In?

Automatic Cleaner is a lightweight application that helps you to automatically clean the Windows temporary folder, which is the data storage location used to hold temporary information and processes created while using the computer. It is used in most Windows operating systems

and it does not require the user's knowledge about the folder structure. After starting the software, it will automatically scan the folder and remove all obsolete files. The program also includes some useful options to configure automatic cleaning, such as an automatic cleanup schedule or a popup notification when files are about to be removed. This application is simple to use and effective to help users clean up their system.

Description: SubfoldersCleaner is a powerful file and folder cleaning utility for Microsoft Windows XP/Vista/7/8/10. It can be used to clean registry (and restore deleted files), trash (and recover deleted files), temporary files, etc. It can scan and clean registry, memory, trash

and Windows temp files. It can also clean the files, folders and registry keys that have special attributes. Description: Decrapifier is a powerful and easy-to-use tool for the hard drive that can recover deleted files or completely delete sensitive files or folders. It is also a non-system process. It can restore deleted files from removable media, but cannot recover deleted data from any application. Description: SmartClean is a file-shrinking utility designed to clean up your hard disk and clean up your computer performance. It is a powerful disk cleaner and file-shrinker that can shred large files and folders, as well as recover the deleted files. You can preview file types and folders while cleaning, which gives you

an intuitive experience to explore files and folders on your computer. As for the file-shrinking, it will safely remove empty files to save disk space. It can quickly remove almost all types of hard disk clutter such as unused or temporary files, history files, cookies, temporary internet files, cache files, records files, etc.

Description: Disk Cleaner is a powerful disk cleaning utility that can help you to free up hard disk space without damaging your data. It is an easy-to-use software which provides a powerful and detailed view of files that could be cleaned, and it also lets you easily pick and choose which files to clean. You can preview the files before cleaning to make sure your important data won't be lost. Once the

cleaning is complete, a log file will show the details of files that were cleaned. If you are comfortable with this tool, you can click the Start button to start cleaning up your computer. Description: Purify is a file-shrinking utility designed to remove the unused files, junk files, temporary files, cookies, Windows temp files, Internet cache, etc. on your system. It is easy to use, and you can preview files and folders before cleaning. You can also easily control
